

Progress Report: Crescendo Connect

Team Name: MP3 Maverick	Date: 17th March,2024
Team Members: Parika Singh, Preetinder Singh, Mohammed Al-Wadeai, Princejot Singh, Jaskirat Singh	Reporting Period: Phase 3

Phase 3- User Interface Mock-Up

Highlights and Accomplishments	What major tasks that have been completed in this phase of the project? In this phase, we made great progress on the Crescendo Connect app by completing a detailed high-fidelity mock-up. The things our group has accomplished is – <ul style="list-style-type: none">• Completion of the High-Fidelity Design Activity, establishing a cohesive visual style guide, including typography, color schemes, and layout.• Creation of a straightforward mobile user interface (UI) using a mobile first approach to make sure the program is designed to be used with one hand.• The development of a static website that functions as the mock-up for the app, with three separate screens—Home, Explore Music, and User Profile—each with interactive components that allow for user input.
Challenges and Issues	What challenges, issues, or obstacles did you encounter and how did you overcome them? It was important to make sure the app was simple for users to navigate, but it was difficult to achieve smooth and intuitive navigation. To tackle this, we streamlined the user interface and arranged the content more logically.
Individual Contributions	What did each member of the team work on in this phase of the project? <ul style="list-style-type: none">• Parika Singh: Typography and color schemes.• Preetinder Singh: Layout and mobile responsiveness.• Mohammed Al-Wadeai: Explore Music screen.• Princejot Singh: User Profile screen and home screen design.• Jaskirat Singh: Home screen design.
Team Plan for Next Phase	What do you plan on completing in the next phase of the project? <ul style="list-style-type: none">• Introducing feedback functionality.• Ensuring full interactivity and improving it for all screens.• Adding more features.
Individual Plan for Next Phase	What do you plan on completing in the next phase of the project? <ul style="list-style-type: none">• Parika Singh: Will take the lead on refining the user feedback mechanisms, ensuring we gather valuable user insights to improve the app's features and usability.• Preetinder Singh: Plans to work on enhancing mobile responsiveness as more dynamic elements are added.• Mohammed Al-Wadeai: Will work on streamlining the app's design, ensuring a smooth and user-friendly experience.• Princejot Singh: Aims to finalize user customization features for all screens.• Jaskirat Singh: Will ensure seamless navigation between the different sections of the app as more features are implemented.
